SUMMARY

Human-Computer Interaction graduate and UX/UI designer specializing in research-driven product design — user research, usability testing, information architecture, prototyping, and design systems. Bilingual, Arabic-first designer with hands-on RTL and localization experience across web and mobile.

EDUCATION

Umm Al-Qura University — Makkah, Saudi Arabia

Aug 2022 – Jun 2026

Bachelor of Human-Computer Interaction · GPA 3.72 / 4.00

SKILLS

UX: User Research, Usability Testing, Information Architecture, Wireframing, Prototyping, Interaction Design, Design Systems, Accessibility (WCAG), RTL / Arabic Localization

Design Tools: Figma, FigJam, Adobe Illustrator, Adobe Photoshop, Canva

Technical: HTML, CSS, SQL, Java (basic), Excel, Power BI (basic)

Soft Skills: Communication, Problem-Solving, Time Management, Collaboration

PROJECTS

Mishkat — Mental-Wellbeing Platform · UX Designer (Graduation Project)

- Delivered an end-to-end Arabic-first mental-wellbeing platform that passed 15/15 usability test cases at a ~1.3-minute average task time, by running user interviews and surveys and translating findings into personas, journey maps, information architecture, wireframes, and a high-fidelity prototype.
- Built an emotion-based design system with AI safety guardrails, enforcing consistent, safe interaction patterns across the product and simplifying developer handoff.

Jarir App Redesign · UX/UI Designer (Information Architecture)

- Cut navigation time by up to 51% and reached 100% task completion in usability testing, by redesigning the core navigation and search flows in Figma.
- Restructured the app's information architecture through a content audit and card-sorting study to simplify findability across the catalog.

Aman — Hajj & Umrah Safety System · UX/UI Designer

- Designed a safety-critical wearable and leader-dashboard system for the Night of Nafrah as part of a 5-person team, owning UI, interaction design, and product naming.
- Reduced false alerts by engineering a four-state risk model across six sensor signals that required two-to-three signals to corroborate before triggering.
- Designed text-free wristband feedback (color, vibration, SOS) for a non-literate persona, supported by network-independent BLE-Mesh alerts and a clickable prototype.

WORK & TRAINING EXPERIENCE

Project Management Intern · DSShield — Riyadh, Saudi Arabia

May 2025 – Jul 2025

- Supported the PMO across multiple live projects — preparing accurate financial documentation (invoices, POs, delivery notes, completion certificates) and analyzing profit-tracking forms in Word, Excel, and Adobe Acrobat.

PROGRAMS & MENTORSHIPS

Banque Saudi Fransi University Program

Aug 2024 – Dec 2025

Selected for a long-term mentorship and professional-development program with Banque Saudi Fransi and the university.

COURSES & CERTIFICATIONS

- Google UX Design Professional Certificate (154 hrs) — Oct–Dec 2024
- UI/UX Design Training Camp (60 hrs) — Dec 2023 – Feb 2024

CAMPUS & COMMUNITY INVOLVEMENT

College of Computing Club — Project Manager; Public Relations & Scientific Committees

2022 – 2026

Kibtar Community — Media / Design Team; Project Management / Developers Team

2024 – Present

LANGUAGES

Arabic — Native · English — Advanced
