SUMMARY

Human-Computer Interaction graduate and UX/UI designer focused on research-driven product design — user research, usability testing, information architecture, prototyping, and design systems, with a bilingual, Arabic-first lens.

EDUCATION

Umm Al-Qura University — Makkah, Saudi Arabia Aug 2022 – Jun 2026
The Bachelor in Human-Computer Interaction · GPA: 3.72 / 4.00

SKILLS

UX Skills: User Research, Usability Testing, Information Architecture, Wireframing, Prototyping, Interaction Design, Design Systems, Accessibility
Design Tools: Figma, Adobe Illustrator, Adobe Photoshop, Canva
Technical Skills: HTML, CSS, SQL, Java (basic), Excel, Power BI (basic)
Soft Skills: Communication, Problem-Solving, Time Management, Collaboration

PROJECTS

- UX Designer — Mishkat Platform (Graduation Project)**
- Designed an Arabic mental well-being platform end-to-end, from research to high-fidelity prototype.
 - Conducted interviews and surveys, shaping personas, journeys, information architecture, and wireframes.
 - Built an emotion-based design system with AI safety guardrails; usability tests with 6 users reached a 1.3-minute average task time and 15/15 passing cases.
- UX/UI Designer — Jarir App Redesign (Information Architecture)**
- Restructured the information architecture through a content audit and card sorting to simplify navigation and search.
 - Redesigned and prototyped the navigation and search flows in Figma; testing showed up to 51% faster navigation and 100% task completion.
- UX/UI Designer — Aman (Hajj & Umrah Safety System)**
- Designed a safety-critical wearable and leader-dashboard system for the Night of Nafrah in a 5-person team, owning UI, naming, and interaction design.
 - Built a four-state risk model across six sensor signals, requiring two to three signals to agree before alerting to cut false alarms.
 - Designed text-free wristband feedback (color, vibration, SOS) for a non-literate persona, with network-independent BLE-Mesh alerts and a clickable prototype.

WORK & TRAINING EXPERIENCE

Project Management Intern — DSShield May 2025 – Jul 2025
Riyadh, Saudi Arabia

- Processed financial claims and prepared accurate documentation — invoices, POs, delivery notes, and completion certificates — in Word, Excel, and Adobe Acrobat.
- Analyzed GP & FD forms to track profitability and supported the PMO team across multiple live projects.

PROGRAMS & MENTORSHIPS

Banque Saudi Fransi University Program Aug 2024 – Dec 2025
Long-term mentorship and professional development program with Banque Saudi Fransi and the university.

COURSES & CERTIFICATIONS

- Google UX Design Professional Certificate — 154 hours Oct 2024 – Dec 2024
- UI/UX Design Training Camp — 60 hours Dec 2023 – Feb 2024
- World Mental Health Day — 20 hours · First Aid Awareness — 40 hours

CAMPUS & COMMUNITY INVOLVEMENT

College of Computing Club 2022 – 2026
Project Management Team (Project Manager role), Public Relations Committee, Scientific Committee.

Kibtar Community 2024 – Present
Media Committee – Design Team; Project Management Committee – Developers Team.
